

National Scenic Visitors Center • Earthwalk USA Map

The National Scenic Visitors Center was founded to lay the groundwork for a map project like no other.

Our vision is to create a tactile, immersive experience that reveals the extraordinary breadth, fascinating history, and remarkable physical nature of the United States from a bold new perspective. The centerpiece of our facility is the largest walkable relief map in the universe. Our goal is to facilitate learning, stimulate adventure, and champion stewardship of the land, water and air.

Earthwalk USA map

- 100-yard long three-dimensional map of continental USA
- Alaska and Hawaii under separate domes
- Canyons, rivers, plains and mountains experienced
- Panoramic Geoshows incorporated into lighted map floor
- History, nature, culture and science exploration

The National Scenic Visitors Center

- Home of the giant walkable Earthwalk map
- Spectacular exhibits celebrating America's National Parks
- Fifty State Rooms revealing the unique character of each
- A one-of-a-kind meeting and event venue
- Retail shop, concessions, and restaurants

Integrated educational, travel, and geography resources

- Learning, exploration and adventure under one roof
- Dynamic, tactile experience of the landscape
- Educational programs - the world's largest interior classroom
- America introduced to domestic and international travelers
- Facilitating geophysical, mapping and technology research
